The Handbook of Pest Management in Organic Farming

Edited by **Vincenzo Vacante**, Mediterranean
University, Italy and **Serge Kreiter**, Montpellier
SupAgro, France

**A comprehensive resource that explores pest
management in organic farming across crop-specific
chapters, with information on the crop, its pests,
bio-ecology and methods of control.**

This book is a comprehensive reference covering pest management in organic farming in major crops of the world. General introductory chapters are included, covering the management of crops to prevent pest outbreaks, plant protection tools in organic farming, and natural enemies and pest control. The remaining chapters are crop-based and discuss geographic distribution, economic importance and key pests.

For each pest the fundamental aspects of its bio-ecology and the various methods of control are presented. Understanding of the scientific content is facilitated with practical advice, tables and diagrams, helping users to apply the suggestions.

Key Features:

- Consists of rational approaches and advice
- Authored by a team of international qualified specialists of pest control
- The only available comprehensive review of insect pest management in organic systems

This is an essential resource for researchers and extension workers in crop protection, integrated pest management and biocontrol, and organic farming systems.
